Wood Engineering Learning Lab

Started in 2016

Centurion University has consistently spearheaded the conceptualisation, navigation and implementation of skill integration, vocationalization of education and capacity building for youth living in difficult geographies, who are bereft of educational and economic opportunities.

The journey started in 2006 when skill training was almost non-existent in the context of higher education in India. The founders of the University, Prof Mukti Mishra and Prof DN Rao, realized that in areas such as Gajapati, which was a LWEA (Left Wing Extremist Area) district, skill training and vocational education could address the poverty and frustration of youth and result in economically gainful employment/self-employment.

In 2010, Centurion University initiated the introduction of Centurion Vocational Qualification Framework (CVQF) format, which recognized prior learning experience and allowed it to be converted to credits that result in vertical movement in formal education system.

In 2017, the Odisha Government notified Centurion University as a "Skill University", one of the first few in the country.

In 2019, Centurion University was declared as Centre of Excellence by Government of India. Centurion is the only University to achieve this distinction.

Woodwork learning lab is one of the leading furniture manufacturing lab in Odisha today, providing complete furniture solutions for all segments through its strong manufacturing base. Our expertise lies in extremely innovative and cost effective customized office furniture, modular work stations, students desks, conference tables, chairs, educational, laboratory retail furniture.
